

ELEVATING VETERINARY HYGIENE.

SANI-99™
FOR VETS

Introducing SANI-99™ for Vets:

Your Ultimate Veterinary Disinfection Solution

SANI-99™ for Vets isn't just any disinfectant; it's a powerhouse with a LOG 7 (99.99995%) efficacy. While other disinfectants may claim effectiveness, SANI-99™ for Vets delivers results backed by rigorous testing and certifications. Its superior formulation ensures consistent performance, and it leaves no harmful residues, making it safe to use around animals. Additionally, it is Fear Free compliant, ensuring a safe and stress-free environment for both animals and staff.

Why Choose SANI-99™ for Vets?

- **Consistent Efficacy:** With a LOG 7 reduction, SANI-99™ for Vets ensures reliable elimination of pathogens, significantly reducing infection risks.
- **Safety for Animals:** Unlike some disinfectants that may pose risks to animals, SANI-99™ for Vets is formulated to be safe on and around animals, providing peace of mind to veterinary staff.
- **Residue-Free:** SANI-99™ for Vets leaves no harmful residues, ensuring that surfaces are safe for both animals and staff immediately after application.
- **Fragrance-Free:** Recognising the potential harm synthetic fragrances can pose to pets, SANI-99™ for Vets is formulated without any added fragrance to ensure a safer, more comfortable environment for animals and staff.

Key Features.

SANI-99™ for Vets is completely alcohol and chlorine-free, making it safe for use in areas where flammable substances pose a risk whilst ensuring that it is non-corrosive and gentle on surfaces. . This feature ensures that your practice remains safe while maintaining high hygiene standards.

Formulated to be safe for use around animals, SANI-99™ for Vets ensures that there are no harmful residues or fumes that could affect the health of your animal patients. You can disinfect confidently, knowing that it is safe for all the animals in your care.

SANI-99™ for Vets is highly effective at eliminating bacteria, boasting an impressive 99.99995% kill rate. This level of disinfection ensures that surfaces treated with SANI-99™ for Vets are not only clean but also safe from harmful bacteria, providing peace of mind in various environments.

Unlike some disinfectants that contain fragrances, SANI-99™ for Vets is fragrance-free, ensuring that it is safe and non-irritating for both animals and staff. This reduces the risk of respiratory issues and allergic reactions, creating a healthier and more comfortable environment in your veterinary practice.

SANI-99™ for Vets is designed to be gentle on hands and safe for animal paws, ensuring both veterinary staff and pets avoid irritation and discomfort. This makes it ideal for frequent use in veterinary practices, maintaining hygiene standards without compromising skin health or animal safety.

SANI-99™ for Vets is both Halal and Kosher certified, ensuring it meets the dietary and lifestyle standards of Muslim and Jewish veterinary professionals and their clients.

Certified Effectiveness.

SANI-99™ for Vets proudly holds certifications that speak to its remarkable effectiveness. It has earned the prestigious [EN 1656](#) and [EN 14349](#) certifications, specifically targeted for veterinary use. These standards ensure it can eliminate harmful bacteria and maintain disinfectant efficacy under practical conditions found in veterinary environments. Additionally, SANI-99™ for Vets has achieved the following certifications:

EN 1040

Proven bactericidal activity, making it reliable for broad-spectrum disinfection.

EN 1276

Demonstrates bactericidal activity, ensuring quick and reliable disinfection in high-traffic areas.

EN 1500

Efficacy in hygienic hand disinfection, vital for maintaining hand hygiene standards in veterinary practices.

EN 1659

Evaluates the bactericidal activity of disinfectants used in veterinary fields, ensuring the highest level of pathogen control in animal care settings.

EN 13697

Effective in surface disinfection, ensuring clean and safe environments for animals.

EN 13727

Demonstrates effectiveness against bacteria commonly found in medical settings, relevant to veterinary surgical areas.

EN 14349

Focuses on the efficacy of disinfectants in animal husbandry, ensuring the safety and health of animals by eliminating pathogens in their environments.

EN 14476

Effective against viruses, including Coronavirus, ensuring comprehensive viral disinfection.

ECHA Compliant.

The European Chemicals Agency (ECHA) plays a pivotal role in regulating chemicals and biocides within the European Union (EU). Compliance with ECHA signifies that a product has undergone rigorous assessment for safety and efficacy. SANI-99™ for Vets has achieved a remarkable milestone by meeting the criteria under the European Chemicals Agency (ECHA) for Product Types 3 and 4. This compliance reflects our commitment to upholding the highest standards of quality and efficacy.

Product Type 3: SANI-99™ for Vets extends its efficacy to veterinary hygiene, earning ECHA compliance for Product Type 3. This recognition makes it a trusted choice for ensuring the well-being of animals.

Product Type 4: When it comes to disinfection in the food and feed areas, SANI-99™ for Vets is a reliable solution. Its compliance under Product Type 4 signifies its competence in this crucial domain.

Additionally, the Department of Environment, Food, and Rural Affairs (DEFRA) has rigorously tested and approved SANI-99™ for Vets for its effectiveness against critical agricultural concerns. This includes:

- Foot and Mouth Disease Orders
- Diseases of Poultry Order
- Avian Influenza and Influenza of Avian Origin in Mammals Order
- General Orders

Fear Free Compliant.

Supports Staff Well Being

Using a product like SANI-99™ for Vets not only benefits the animals but also supports the well-being of veterinary staff. By reducing the risk of respiratory issues and skin irritation associated with harsh chemicals, it creates a healthier and more comfortable working environment for your team.

Safe and Gentle Formulation

SANI-99™ for Vets is formulated to be non-toxic and gentle on both animals and staff. Its superior formulation leaves no harmful residues, making it safe to use around animals without causing irritation or harm.

Promotes a Healthier Environment

By choosing Fear Free compliant products, veterinary practices can demonstrate their commitment to the well-being of animals. This can enhance client trust and satisfaction, knowing that their pets are cared for in a stress-free and safe environment.

Reduces Animal Stress

Traditional disinfectants can be harsh and stress-inducing for animals due to strong odours and irritating chemicals. SANI-99™ for Vets, being fragrance-free and non-irritating, helps maintain a calm and stress-free environment, making it easier to perform examinations and treatments.

Comprehensive Protection

Fear Free certification complements SANI-99™ for Vets' broad-spectrum efficacy against microbial threats, including bacteria, viruses, and fungi. This ensures that veterinary practices can maintain the highest standards of hygiene and safety.

Enhanced Hygiene Standards

With a LOG 7 (99.99995%) efficacy, SANI-99™ for Vets ensures a high level of disinfection, significantly reducing the risk of infections. This not only protects animal patients but also ensures a safer working environment for veterinary staff.

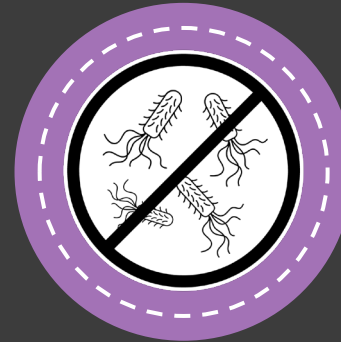

Unparalleled Log Reduction.

A 7-log reduction means SANI-99™ for Vets eliminates 99.99995% of pathogens, far surpassing typical disinfection standards. This level of efficacy is critical in preventing the spread of infections in veterinary environments, where the health of animals and the safety of staff are paramount.

SALMONELLA

Salmonella is a common pathogen that can be found in the intestines of animals and can easily spread in veterinary settings. It poses a risk not only to animals but also to veterinary staff who handle contaminated surfaces or animals. SANI-99™ for Vets effectively kills Salmonella, reducing the risk of cross-contamination and ensuring a safer environment for both animals and staff.

STAPHYLOCOCCUS

Staphylococcus bacteria, including Methicillin-resistant Staphylococcus aureus (MRSA), are a major cause of surgical site infections in veterinary clinics. These infections can lead to complications and prolonged recovery times for animals. SANI-99™ for Vets is highly effective against Staphylococcus, helping to maintain sterile conditions in surgical areas and reducing the risk of post-operative infections.

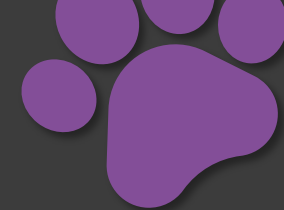

LISTERIA

Listeria is a significant concern in areas where food is prepared for animals, such as in veterinary clinics, kennels, and shelters. This bacterium can thrive in refrigerated environments and contaminate food supplies, leading to severe infections in animals. SANI-99™ for Vets effectively eliminates Listeria, ensuring that food preparation areas remain safe and free from contamination, thus protecting the health of animals.

E.COLI

Escherichia coli (E. coli) is commonly found in the digestive tract of animals and can cause severe gastrointestinal illnesses if proper hygiene is not maintained. In veterinary settings, E. coli can contaminate animal housing, treatment areas, and equipment. SANI-99™ for Vets ensures that these areas are thoroughly disinfected, preventing the spread of E. coli and protecting the health of animals under care.

Versatile Application.

SANI-99™ for Vets adapts seamlessly to diverse settings, making it an ideal choice for a wide range of applications. Whether you're in a bustling animal hospital, a busy veterinary clinic, or an animal shelter, SANI-99™ for Vets is your trusted disinfection partner.

Surface Compatibility: "Works on Multiple Surfaces"

SANI-99™ for Vets doesn't discriminate when it comes to surfaces. From hard, non-porous materials like stainless steel and glass to various surfaces you encounter daily, SANI-99™ for Vets is compatible with a wide range of materials. You can confidently use it on examination tables, surgical instruments, animal cages, and more, without worrying about damage.

Comprehensive Disinfection Methods.

SANI-99™ for Vets stands as a beacon of versatility in the world of disinfection. Our product offers a comprehensive array of disinfection methods, ensuring that you have the right tool for every situation in your veterinary practice. Here's how SANI-99™ for Vets can meet your diverse disinfection needs:

Surface Disinfectant Spray:

Our SANI-99™ solution is specially formulated for surface disinfection, providing a powerful and reliable method to eliminate pathogens from countertops, examination tables, surgical instruments, and other critical surfaces. This ensures that all surfaces in your veterinary practice remain safe and hygienic for both animals and staff.

Surface Disinfectant Wipes:

For quick and easy disinfection, SANI-99™ antibacterial wipes offer a convenient solution tailored for veterinary practices. Ideal for wiping down frequently touched surfaces such as examination tables, medical equipment, kennel doors, and reception counters, these wipes provide an effective way to maintain cleanliness and hygiene throughout the day.

Other Methods:

We understand that each veterinary practice has unique disinfection needs. SANI-99™ for Vets offers tailored solutions to meet these diverse requirements. Whether you need specialised disinfection methods or custom application techniques, our product can be adapted to provide the most effective and efficient disinfection for your specific environment.

Gentle on Hands, **Safe on Paws.**

When it comes to caring for animals, veterinarians understand the importance of using products that are safe and gentle. This is especially crucial for disinfectants used in veterinary practices. Harsh chemicals can cause irritation and discomfort for both veterinary staff and the animals in their care. That's why SANI-99™ for Vets is designed to be gentle on hands and safe for paws, making it the ideal choice for veterinary practices.

Gentle on Hands: SANI-99™ boasts a gentle formula that is safe for hands. Regular use of harsh disinfectants can lead to irritation and discomfort. With SANI-99™ for Vets, you can experience the difference of a formula that cares for the skin, making it ideal for frequent use in veterinary practices.

Safe on Paws: SANI-99™ isn't just about disinfection; it's about ensuring the safety and comfort of your animal patients. Our gentle formula is safe for use around animals, preventing irritation on sensitive paws. In veterinary environments, where animals frequently come into contact with various surfaces, it's crucial to use a disinfectant that won't cause harm. SANI-99™ offers this peace of mind, allowing you to maintain a clean and safe environment without compromising the well-being of the animals in your care.

**“SANI-99™ for Vets
combines powerful
disinfection with a gentle
formula, ensuring the
utmost care for your
hands and your animal
patients' paws.”**

The Importance of **Fragrance-Free.**

Why Choose Fragrance-Free?

Fragrance-free disinfectants like SANI-99™ for Vets are essential in maintaining a safe and healthy environment for both animals and veterinary staff. While scented disinfectants may seem appealing due to their pleasant smell, they can pose significant risks, particularly in veterinary settings. Here's why choosing a fragrance-free option is the best decision for your practice:

Eliminates Risk of Respiratory Issues and Allergic Reactions: By opting for a fragrance-free disinfectant, you significantly reduce the risk of respiratory problems and allergic reactions in both animals and staff. SANI-99™ for Vets ensures a comfortable environment without the hazards associated with synthetic fragrances.

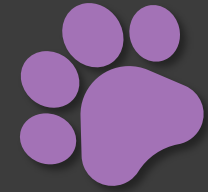

Reduces Stress in Animals: Without the overwhelming scent of synthetic fragrances, animals are less likely to experience stress and anxiety. This leads to a calmer environment, making it easier to perform examinations and treatments.

Safer for Frequent Use: Veterinary staff who use disinfectants multiple times a day benefit from a fragrance-free formula. SANI-99™ for Vets is gentle on the skin, reducing the risk of irritation and allowing for safe, frequent use.

Environmentally Friendly: Fragrance-free products often contain fewer chemicals, making them a more environmentally friendly option. They contribute less to air pollution and are generally safer for the ecosystem.

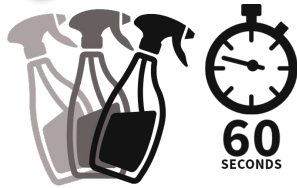

Simple Preparation.

- 1 Fill sprayer with 1 litre of water, tear sachet open and pour contents into bottle.

- 2 Shake bottle for a minimum of 60 seconds.

- 3 Spray onto surface and leave to dry.

Using SANI-99™ for Vets is not only about incredible efficacy but also about unparalleled convenience. Discover how effortless it is to harness the power of this remarkable disinfection solution:

- **Preparing SANI-99™ for Vets:** The beauty of SANI-99™ for Vets lies in its simplicity. Just mix 6g (1 sachet) of SANI-99™ disinfectant powder with a single litre of tap water, and you're ready to go. No complicated formulas, no lengthy processes—just straightforward preparation for exceptional results.
- **Long-Lasting Efficacy:** SANI-99™ for Vets doesn't just work quickly; it keeps working for a long time, providing extended protection. When we say 'extended protection,' we mean that after you've used SANI-99™ for Vets to disinfect a surface, it continues to kill harmful germs and pathogens for an extended period, staying active in the solution until the next contamination occurs. This means that even if a surface is exposed to potential contaminants again, SANI-99™ for Vets remains effective, ensuring lasting cleanliness and safety.

ONE BOTTLE "For Life".

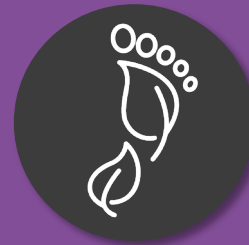

ECO FRIENDLY SOLUTION

SANI-99™ for Vets "One bottle for Life" approach revolutionises traditional disinfectant packaging and addresses the global plastic bottle pollution crisis. By formulating the disinfectant as a powder and providing a specially designed 1-litre reusable bottle, we eliminate the need for single-use plastic bottles. With SANI-99™ for Vets, you can actively contribute to reducing plastic waste and promote a greener, more sustainable future.

EFFICIENT TRANSPORTATION

Embracing SANI-99™ for Vets powder-based solution offers more than just environmental benefits. The compact size and lightweight nature of our sachets drastically reduce transportation requirements compared to pre-mixed disinfectants. This results in a significant decrease in carbon emissions and fuel consumption. Transporting equivalent quantities of SANI-99™ for Vets requires a fraction of the resources needed for traditional disinfectants, making it a more efficient and environmentally responsible choice.

MINIMISED PRODUCT WASTE

With SANI-99™ for Vets innovative powder form and the "One bottle for Life" concept, businesses can efficiently manage their inventory without the risk of product waste. Unlike traditional disinfectants that come in pre-mixed solutions with limited shelf life, SANI-99™ for Vets sachets have a longer shelf life, allowing facilities to stock up on the product without concerns of expiration or spoilage. This ensures that every sachet is used effectively, reducing unnecessary waste and optimising resources.

Choose SANI-99™ for Superior Veterinary Disinfection.

- ✓ Broad Spectrum Efficacy.
- ✓ Non-toxic Formula.
- ✓ Fear Free Compliant.
- ✓ Ease of Use.
- ✓ Fast Acting.
- ✓ Regulatory Compliance.
- ✓ Environmental Responsibility.
- ✓ Gentle on Hands, Safe on Paws.
- ✓ Fragrance-Free.
- ✓ Odour Control.

SANI-99™ for Vets is the ultimate disinfection solution, providing broad-spectrum efficacy, rapid action, and versatile application methods. Its non-toxic, environmentally friendly formulation ensures a safe and healthy environment for both animals and staff. Trust SANI-99™ for Vets for superior disinfection and enhanced quality of care in your practice.

SANI-99™ for Vets is a formidable defence against a broad spectrum of microbial threats prevalent in veterinary environments, offering comprehensive protection to ensure the highest standards of hygiene and safety. It is also Fear Free compliant, providing a safe and stress-free experience for both animals and staff.
